

## ShelfSync – Smart Bookstore Inventory & Marketplace Platform

### Project Overview:

ShelfSync is a frontend-only bookstore inventory and marketplace web application developed as part of an internship project. It demonstrates how a modern bookstore system works using role-based pages.

### Technology Stack:

- HTML5
- CSS3
- No Backend (UI-only for this phase)

### User Roles:

1. Admin – Manages inventory, sellers, dashboards
2. Customer – Browses and views books
3. Seller – Lists books and manages stock
4. Delivery Partner – Views delivery assignments

### Pages Included:

- Landing Page
- Login Page
- Sign Up Page
- All Books Page
- Book Details Page
- Seller Details Page
- Admin Dashboard
- Inventory Page
- Seller Dashboard
- Delivery Dashboard

### Internship Note:

This project focuses on UI design, structure, and documentation. Backend integration is planned for future phases.
